

### Using begin2ride curriculum for Private Lessons (04.22.09)

The begin2ride program can easily and efficiently be used as a curriculum for private lessons.

Model the private lesson as a “Class of One” student. This will keep the structure intact for all the mishap and liability reduction built into the begin2ride curriculum.

Insurance would be exactly the same whether it is a class of one or a class of more than one.

A wonderful feature of the Session 1 exercises and all the braking exercises, is that for one student, the area required is a mere 40 feet by 140 feet! This may be of great value for those wanting to provide private lessons.

All the exercises can be completed with one student in an area of 130 feet by 180 feet!
